BONAIRE

THE WORLD'S TOP FREEDIVING DESTINATION

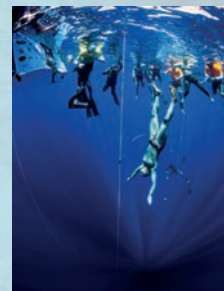

3RD
ANNUAL
FREEDIVING
EVENT

Bonaire Deepsea Challenge is an international freediving world record event and competition. Located in paradise pristine waters of Bonaire island.

In previous years, freedivers from countries such as Spain, U.S., Russia, U.K., Netherlands, Honduras, Curacao, Brasil, Chile, France, Venezuela, Puerto Rico and more, have come to Bonaire to participate in this world class event and push the limits of the human body.

Deepsea Freediving School is proud to have hosted over a dozen of **National, Continental, World** and **Guinness Records**.

FREEDIVING COMPETITION

During the nine days of event/competition, locals and world class freedivers will gather at Kralendijk, Bonaire. During the event, spectators will witness these athletes reach underwater depths over 70m. They enter an inner battle in 4 freediving disciplines.

FIM: Free Immersion is one of the pillars of competitive freediving. The athlete pulls him/herself from the rope in descence and ascend. Fun fact: *Jeanine Grasmeijer (NED) broke the women World Record in FIM -92mts on Bonaire Deepsea Challenge 2016.*

CWT: Constant Weight is the largest competitive discipline in the world, it is also the discipline represented in Deepsea Productions B.V. logo. The freediver descends with fins and ascends equally.

CNF: Constant Weight no Fins is the most pure discipline in freediving. The freediver descends and ascends using only the propulsion of his body.

STA: Static apnea is the discipline where athletes hold their breath without movement as long as possible lying face down in the water. The diver must relax as much as possible.

BONAIRE DEEPSEA CHALLENGE 2017

WORLD RECORD ATTEMPTS

Carolina Schrappe (Brazil) will attempt the female AIDA Variable Weight World Record on 16, 20 and 24 of September during Bonaire Deepsea Challenge. Current Record is at -130mts, she needs to do more. Deepsea Freediving School is proud to be host of this amazing challenge.

CAROLINA SCHRAPPE

Variable Weight: Freediver descends with the help of a ballast weight and ascends using his own power: arms and/or legs, eright by pulling or not on the rope.
